DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C 121:
 - I. Claims 1-32, 57-62 drawn to a communication quality measuring method are classified in class 375, subclass 142, 145.
 - II. Claims 33-56 drawn to a synchronization detecting method and detecting device are classified in class 375, subclass 354, 355.
2. Inventions of groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of the claim groups I and II involve totally different concepts as above, which would involve a search of at least two different classifications.
3. Because these inventions are distinct for the reasons given above and the search required for Group I and not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
